

## Terragen

---

Terragen develops biological products to promote plant and animal health in agriculture.

Its unique microbiome related technology platform underpins Terragen's product development. The technology is based on naturally occurring bacteria, their genetic composition and the compounds they produce.

Terragen Biotech Pty Ltd (Terragen) is a Melbourne based, Australian owned Ag-Biotech company. Since its beginnings in 2010, the company has grown from a small team of highly innovative scientists working in a laboratory, to now also include medium-scale production and product sales spanning the Eastern states of Australia. Terragen is currently engaged in the discovery, development and manufacture of novel antibiotics, bio-fungicides and plant growth promoting products.
